EDUCATION

Northeastern University | *Boston, MA*

Sep 2024 – Present

Master of Science in Computer Science (Khoury College of Computer Sciences)

Relevant Coursework: Algorithms, Data Structures, Object-Oriented Design, Database Management Systems, Discrete Structures, Human-Computer Interaction

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C | **Frontend:** React, Next.js, HTML, CSS, Tailwind CSS | **Backend:** Node.js, Django, REST APIs, GraphQL | **Databases:** MySQL, MongoDB | **Tools:** Git, Selenium, JUnit, Figma

WORK EXPERIENCE

LongevAI Inc. | *AI Developer Intern*

Feb 2026 – Present

- Developing a full-stack geriatric health platform using React, Next.js, and Node.js; integrating REST and GraphQL APIs to deliver real-time cognitive and emotional health data to clinical staff.
- Overhauled the UI of an MVP veterinary clinic system spanning 5 role-based dashboards (receptionist, doctor, lab, pharmacy, grooming), redesigned the color scheme and resolved visual inconsistencies.
- Authored a QA document cataloging 106 bugs and UI issues with documented fixes, used as the team's primary reference for ongoing bug resolution.

Latitude Health | *Software Engineering Intern*

May 2024 – Aug 2024

- Built a UM Reviewer dashboard end-to-end: translated Figma designs into React components, integrated Python backend APIs, and delivered the full feature within 2 weeks.
- Designed 9 reusable React components (Tooltip, Status, Priority indicators) adopted across multiple pages, reducing repeated development effort for the team.
- Developed 4 user-facing pages, including SSO-enabled login and error handling flows, delivering a production-ready interface ahead of the company's first client onboarding.

Wyoming Global Research World Pvt. Ltd. | *Web Developer*

Oct 2022 – Nov 2023

- Built a chatbot system using the ChatGPT AI Engine plugin to automate student and institutional queries for educational institution websites.
- Evaluated 3 chatbot frameworks on usability, response latency, and integration complexity, recommending the top-performing model for production deployment.
- Implemented conversational workflows to handle recurring queries, reducing the need for manual responses from administrative staff.

Cognizant | *Software Intern*

Apr 2022 – Aug 2022

- Developed automated test suites using Selenium, Java, and XPath to validate UI functionality and frontend-backend data integrity across 4 landing pages within a 6-engineer Agile team.
- Contributed across development, testing, integration, and deployment phases for 3 client projects during a 3-month engagement, working with HTML, CSS, and SQL.

PROJECTS

UI Inspector | *JavaScript, Chrome Extension API, HTML, CSS*

- Built a Manifest V3 Chrome extension for frontend QA, traversing the React Fiber tree to identify source components and capturing element screenshots via html2canvas.
- Logs severity-tagged issues with computed styles and CSS selectors into a persistent sidebar, with JSON and CSV export for structured developer handoff, used to document 106 UI bugs during co-op.

Student Database Management System | *Java, SQL*

- Built an academic management system using MVC architecture with CRUD operations across 15+ relational tables, with optimized schemas and queries handling complex multi-table relationships for students, courses, and enrollments.

PUBLICATION

Fuzzy-Based Hierarchical Routing Protocol for Wireless Sensor Networks | *Springer (Sustainable Computing)*

- Co-authored research on applying fuzzy logic algorithms to optimize decision-making and resource allocation in distributed systems, with simulation and performance analysis in MATLAB.
